Email: sunli@example.com | Phone: 138-0004-0004 | Location: Beijing

EDUCATION

Tsinghua University, Master of Computer Science (Machine Learning), 2020 - 2023

Tsinghua University, Bachelor of Mathematics, 2016 - 2020

WORK EXPERIENCE

Kuaishou (2023 - Present)

Senior Algorithm Engineer

- Designed and deployed short-video recommendation system using DNN + multi-task learning
- Built feature store serving 1B+ user behavior features with < 50ms latency
- Led A/B testing framework, drove 15% CTR improvement
- Published 2 papers at RecSys and SIGIR

PROJECTS

Deep Interest Network (DIN) for E-commerce | 2022

- Tech Stack: TensorFlow, Python, Spark, Kafka
- Description: Implemented DIN for click-through rate prediction, 8% AUC gain
- Duration: 4 months

Multi-modal Content Understanding | 2024

- Tech Stack: PyTorch, CLIP, FAISS, Ray
- Description: Built video-text-image joint embedding for recommendation
- Duration: 6 months

SKILLS

Python, PyTorch, TensorFlow, Spark, Kafka, FAISS, SQL, RecSys, Multi-task Learning, A/B Testing, C++ (basic), CUDA (basic)

SELF SUMMARY

Algorithm engineer with 3 years of experience, specialized in recommendation systems. Strong in DNN, feature engineering, and large-scale system deployment.
