EDUCATION

Pingdingshan University, Bachelor of Software Engineering, 2023.09 - 2027.06

Certificate: English CET-6

SKILLS

- Java: solid foundation; proficient in Spring Boot, MyBatis, Lombok; familiar with Axios and RESTful API design
- Spring AI: ChatClient, ChatMemory; familiar with Prompt design and Function Calling; hands-on experience integrating LLMs and streaming chat
- Familiar with Coze, Dify; experience building Agent workflows and custom plugins
- Familiar with Prompt Engineering, AI Agent, RAG; hands-on with AI Coding / LLM-assisted dev
- Redis: data structures, caching strategies, Redis Stream for async messaging, Lua atomic operations, well-versed in cache penetration/breakdown/avalanche issues
- Vue + Element UI; basic frontend development; WeChat mini-program experience
- Daily use of Cursor, Claude Code, Trae for vibecoding to debug and boost efficiency
- Proficient in Git, Markdown

PROJECTS

JK Smart Elder Care (Full-stack Developer) | 2025.12 - 2026.01

Tech: SpringAI + SpringBoot + MyBatis + MySQL + Redis + Vue 3 + WeChat Mini-Program
+ JWT + AliyunOSS + AOP + PageHelper + Nginx

- One-stop platform for community elder care: service packages, cart/checkout, WeChat Pay, address management, etc.
- LLM integration: extended AlibabaOpenAiChatModel, compat with Bailian, ensured Function Calling works
- AI tool calling + data trust: SpringAI @Tool queries DB before answering, suppresses service-name / price hallucination, implemented "AI helps user add to cart"
- Auth: JWT + custom interceptor, separate user-side and admin-side requests
- Cache: Redis hot service list + cache key version prefix for bulk invalidation
- Persistence: MyBatis + PageHelper for order / service / stats SQL
- Cross-cutting: SpringAOP for auto-filling common fields and decoupling logging

Food & Fun Local Platform (Full-stack Developer) | 2026.01 - 2026.03

Tech: SpringAI + Spring Boot + MyBatisPlus + MySQL + Redis + Nginx + Maven
+ ChatMemory + ChatClient

- One-stop local food / entertainment service + content platform
- AI chat: Spring AI ChatClient + OpenAI API; AOP-style Advisor chain for chat logging and memory management
- Async flash-sale: Redis Stream MQ, response 460ms -> 140ms
- Oversell prevention: Redisson distributed reentrant lock / optimistic lock
- Cache: multi-level Redis cache + Lua atomic ops; handles cache penetration/breakdown/avalanche
- Data safety: Redis master-slave + Sentinel cluster for dual-write consistency
- Deployment: Docker for services, Nginx for reverse proxy and load balancing

SELF SUMMARY

Deeply passionate about future-oriented tech (especially AI); follow and learn the latest technologies and AI tools daily. Open to challenging work, lifelong learner. Optimistic, detail-oriented, strong sense of responsibility; held multiple department leader roles in college. Strong self-learning and problem-solving ability; active on Bilibili, Gitee learning open source.
